

**A VIRTUAL GATHERING ON
SUSTAINABILITY & SOCIAL RESPONSIBILITY**

Featured Speakers From

**Carbon Neutrality
Initiative**

It's April 1, 2021 and TLN kicked off Q2'21 & Earth Month with our Three B Summit on Sustainability and Social Responsibility. Thanks to our panelists from UPS, Willdan, University of California Office of the President, City of Irvine, NREL, SunRun and Tesla, who did a great job of informing and inspiring us about their sustainability goals, especially around energy. We all connected from Orange County, Atlanta, Denver, San Diego and San Francisco as we talked about making a business case for saving money, reducing our impact on the environment, creating job opportunities and taking care of employees. Between the four publicly-traded companies, the UC school system and the City, our panelists represent more than 1 million stakeholders: employees, students and residents; millions of square footage in real estate & buildings, 500 airplanes and thousands of vehicles in their fleets! This is the first of more conversations with TLN, and it was a perfect way to start Earth Month!
